## Brooke Advises the Reorganizing of

THE ARMY ON MODERN LINES

Are Sent Up For Punishment.

WASHINGTON, Oct. 12. 1900.-The President and his Cabinet have devoted considerable time to Chinese matters since his return to Washington this week, but there has been very little made public, except that the answer of this government to the proposals of France for dealing with China had been prepared and forwarded. There is about as wide a difference bethe administration and of those held by European members of the diplomatic corps on the present status af affairs in China and the outlook for a settlement as existed previous to the rescue of the foreigners in Pekin. Then, as now, this government trusted China, while the European diplomats distrust it now as much as they did then. Members of the administration hold the opinion that the refusal of the Chinese government to return to Pekin will not delay the negotiations, while the diplomats think it will, and that it will be weeks perhaps months, before the negotiations are started. Minister Conger has sent to Washington the names of a dosen Chinamen of prominence who deserve punishment for participation in the Boxer troubles, but the Chinese government has only ordered the punishment of three of them.

Gen. John R. Brooke, commander of the Military department of the East, in his annual report to the War Department, made public this week, makes a strong plea for the reorganization of our cipal coast city of Costa Rica, has been its publication. He doesn't think he army on modern lines. He says: "For destroyed by fire. The loss is estimat- ought to finish his history before Lord. many years past the general officers of |ed at ten millions. the army have shown the necessity for an increase which will place the army on an effcient basis and enable it to perform its duties with credit to itself Heath of the republican national comand to the satisfaction of the nation. mittee yesterday gave out statements The events since the commencement of that New York is safely republican by the Spanish war have demonstrated be- eighty thousand. youd doub the necessity for reorganization which will enable this nation to maintain the position in which it now the army may form the bulwark behind thr volunteer army may be created, as has always been done in our country by organizing the people."

Ever since their introduction there has been a controversy among army officers as the advantages of the costly disappearing gun carriages on coast fortifications. The board of ordnance and fortifications has taken a hand in the controversy by recommending to the secretary of war that no more disappearing gun carriages be made.

The bureau of engraving and printing is now employing the largest workbeing 200,000 sheets of internal revenue stamps, 40,000 sheets of postage stamps, 8,000 sheets of national bank notes, four on a sheet, 72,000 sheets of

miscellaneous work.

to be getting worse all the time.

timony has been going since the subject has been before the commission.

The secretary of the navy had another conference this week with officers of the steel companies which have the facilities for making armor plate, which ended with the submission of propositions and counter-propositions which naval officials say are so near together that they regard it as certain that an agreement will soon be reached, and that no government armor-making plant will be established under the authority conferred on the secretary by congress.

German cotton manufacturers are getting alarmed for fear that something might cut off their supply of raw Will practice in District Court of Cochise Names of a Dozen Chimamen from this country. The United States Of material, which comes almost entirely consul at Annaberg, Germany, reports to the department of state that the German Colonial Association has recently sent a petition to the imperial chancellor, asking that every means be used to introduce cotton growing into German colonies where soil and climate favor. The consul added: "If, for some reason. Germany should be cut off for one year from her cotton supply there would be a crisis of incalculable consequences. Germany, France and England have never forgotten the days the civil war, when their cotton supply was cut off by the blockade of the southern states."

#### AMERICAN WORKMEN ORDERED OUT tween the opinions of members of Ten Painters at Toronto Told to Leave the Country.

TORONTO, Ont., Oct. 17 .- Many Canadian workmen have been deported from Buffalo by Agent Debarry during the past two years, and the Dominion government agent has arrived here from Ottawa and ordered ten Cleveland painters and decorators who were at work on a private residence to leave Canada within twenty-four hours. They were brought to Toronto by a Cleveland firm. Toronto workmen, who have long complained about the failure of the authorities to enforce the alien labor law, notwithstanding the presence here of a number of American laborers, say now that at last it has been proved workable and can be used to protect them against alien contract labor.
